ATTEST:

CITY CLERK

Presented to Mayor:

JUL 21 2022

Received from Mayor:

JUL 25 2022

Amending Title 3, Chapter 47 of the Minneapolis Code of Ordinances relating to Air Pollution and Environmental Protection: Energy and Air Pollution.

The City Council of the City of Minneapolis do ordain as follows:

Section 1. That Section 47.160 of the above-entitled ordinance be amended to read as follows:

47.160. - Paint Booth requirements. (a) All spray painting of commercial and industrial materials must be conducted indoors and in a registered paint booth as required under section 47.40 of this Code. The paint booth must be equipped with exhaust filters capable of collecting paint, dust and other particles to minimize air pollution. Factors to be considered include filter size, filter material, capture efficiency, air

volume, velocity, exhaust flow, and fire safety. The paint booth must be properly maintained according to the manufacturer's specifications.

~~(b) Commercial and industrial materials which are physically unable to be painted indoors, such as public infrastructure, are exempt from the paint booth requirements but must be contained sufficiently to minimize fugitive emissions. Paint facilities, specific to automotive (including heavy duty, light duty, and all transportation related trucks and semis), must use waterborne base coats, low-Volatile Organic Compound (VOC) base coats (3.5 lbs./gallon), or low-VOC single stage (2.8 lbs./gallon) or purchase less than one hundred fifty (150) gallons of VOC containing materials each calendar year as reported on the VOC usage document report from your paint supplier. If the facility ships waste coatings and cleaning materials off-site for reclamation or reuse, the shipped amount may be subtracted from the annual total. VOC content limits as defined are calculated as regulatory VOC, less water and exempt compounds.~~

(c) Paint facilities must use only high volume, low pressure (HVLP) or equivalent spray equipment.

(d) Commercial and industrial materials which are physically unable to be painted indoors, such as public infrastructure, are exempt from the paint booth requirements but must be contained sufficiently to minimize fugitive emissions.
